**EX PARTE FILING OF WIRELESS EXCELLENCE LIMITED
REGARDING THE SECOND FURTHER NOTICE OF PROPOSED RULE MAKING**

Dear Ms. Dortch :

Wireless Excellence Limited ("Wireless Excellence") designs and manufactures high performance wireless communications products including licensed and unlicensed point-to-point and point-multi-point microwave equipment with installations in over 60 countries worldwide.

Wireless Excellence commends the Commission for asking industry for ways to allow the use of small or "non-compliant" antennas without causing harmful interference to existing operators or blocking new applicants. Today, the major obstacle to providing carrier-grade (licensed) broadband services to un-served and underserved communities is the high cost and high monthly lease charges of unnecessarily large Category B antennas. We agree with the Wireless Strategies Inc. ("WSI") demonstration via their decision tree diagrams that Rules 101.103 and 101.115(c) ensure that small antennas of any size can be safely deployed and will not cause harmful interference to existing stations or block new applicants.

We therefore request that the Commission allow the use of small antennas so that antenna performance can be optimized for the application with the assurance that this can be done safely under Rules 101.103 and 101.115(c).

Respectfully submitted,

Stephen Patrick, Director
